INTERAVIA

Interavia Aerospace Review

ANNUAL INDEX FOR 1987

SUBJECT INDEX

AIR TRANSPORT

All Nippon to buy A320s: 1/12
California gold rush continues: 1/12
Charter airline sets sights on European trunk routes: 1/13
Boeing 7J7 design to be frozen in July: *Pierre Condom*: 1/23
Has the Orient Express been murdered? *Bill Sweetman*: 1/27
Help from the West for China's airline development: *David Woolley*: 1/33
Hong Kong company eyes 747-400 impact, China markets: *David Woolley*: 1/35
Escaping from burning cabins – are smoke hoods the answer? *Bron Rek*: 1/37
McDonnell Douglas launches MD-11, Lufthansa goes for SuperFanned Airbus A340: 2/96
Fokker defends its short-haul stronghold: *Bron Rek*: 2/111
A slimmer British Airways faces the punters: *David Woolley*: 2/115
Towards a better LOT for Poland: *Brian Wanstall*: 2/117
IATA's insurance company starts business: 3/192
Mounting speculation about Pan Am's future: 3/193
1987 choice of commuter airliners as great as ever: *Bron Rek*: 3/213
Commuter financing gets more sophisticated: *Bron Rek*: 3/225
Commuter cabin interiors – making the most of inner space: *Bron Rek*: 3/230
Equipment for the small airport: *David Woolley*: 3/233
TWA's strange bid for USAir: 4/300
Pan Am plans German shuttles: 4/301
Airliner finance attracts big crowd: *Bron Rek*: 4/319
Exciting times for Europe's charter airlines: *Bron Rek*: 4/323
German charter airline business grows: *Peter Pletschacher*: 4/324
Iberia privatisation looms, but not before profits: 5/406
Satellite communications for aviation: Inmarsat team presses ahead: 5/407
US regional growth slows, industry gets more concentrated: *Bron Rek*: 5/421
ARINC wins support for AvSat program: *Bron Rek*: 5/427
FAA moves to calm maintenance controversy: *Bron Rek*: 5/431
Satisfactory first quarter for US airlines: 6/536
Derivatives dominate 'new' airliner scene: *Bron Rek*: 6/557
Advanced propellers – all eyes on Boeing and GE: *Bill Sweetman*: 6/567
A330/340 launched with backing from ten airlines: 7/688
Australia's domestics prepare for liberalisation – two's company, three's a crowd: *Charles Gilson*: 7/701
JAL prepares for life in the private sector: *Bron Rek*: 7/707
Dornier aims the Do328 at the 30-passenger market: *Peter Pletschacher*: 7/711
Clearer skies for Egyptair: *Brian Wanstall*: 7/715
CASA CN-235 – last but not least: *Jacques Clostermann*: 7/719
IATA's insurance company faces tough competition: *Bron Rek*: 7/727
Europe's future computer reservations system(s) not so independent of the USA: 8/780
United empire to be broken up: 8/781
Advanced technology for smaller commuter aircraft: *Bron Rek*: 8/812
Computer reservations controversy spreads: *Bron Rek*: 8/819
Amadeus and Galileo vie for CRS customers: 9/880
Pan Am unions attract suitors: 9/881
ICAA Congress to tackle airport capacity question: *Bron Rek*: 9/897
BR-2000 – a bold workhorse? *Bertrand Bonneau*: 9/903
The Antonov An-74 brings high tech to low temperatures: *Mark Lambert*: 9/907
Civil air transport security: *Frank G. McGuire*: 10/1083
Future airliner cockpits: *Pierre Condom*: 10/1089
Saab 340B flies: 11/1136
Thirty thousand passengers state their preferences: *Pierre Condom*: 11/1177
IATA meets in shadow of stock market crash: 12/1236
United Parcel Service creates its own airline with the 757PF: *Ramon Lopez*: 12/1261
NATCO seeks answers to the pilot crisis: *Bill Sweetman*: 12/1265

DEFENCE

Decisions soon on British military helicopter procurement: 1/16
German Luftwaffe Super Phantoms: 1/17
First flight of Jet Squalus imminent: 1/17
Stealth in service: *Bill Sweetman*: 1/39
The efficient fighter – small is not necessarily beautiful: *Charles Gilson*: 1/45
A new approach for USAF's Advanced Tactical Fighter: *Bill Sweetman*: 1/49
Middle East and North African air forces – too much and too little: *Brian Wanstall*: 1/53
G-LOC – new ideas but no easy cures: *Bill Sweetman*: 2/121
A new image for the "mud movers" – Eglin proves precision weapons: *Brian Wanstall*: 2/125
Fighter radar – is there a trans-Atlantic generation gap? *Charles Gilson*: 2/131
Stril 90 – updating Sweden's air defences: *Brian Wanstall*: 2/137
Zircon: the unsecret Sigint satellite: 3/198
Replacing the Warthog: 3/198
Fire and forget – prime need for 1990s air combat: *Brian Wanstall*: 3/239
Turboshaft developments in the USA: *Bill Sweetman*: 3/249
Europe consolidates its turboshaft family: *Charles Gilson*: 3/255
MTU keeps its technology sharp: *Peter Pletschacher*: 3/257
F-15E – heavyweight Eagle: *Bill Sweetman*: 3/262
France decides on AWACS: 4/304
B1-B: still problems: 4/304
Engines for prototype Eurofighters: 4/304
Patriots for Italy? 4/304
Is teaming good for your health? *Greg Waskul*: 4/327
And now, the stealth-defeating radar! *Bill Sweetman*: 4/331
The USA builds its OTH-B radar barrier: Ramon Lopez: 4/334
European perspectives on air defence radars: *Brian Wanstall*: 4/339
Trainers for combat – affordable and credible or marketing manoeuvre? *Brian Wanstall and Mark Lambert*: 4/341
MiG-29 picture shows armament: 5/410
Pentagon assesses Soviet forces: 5/410
Aeritalia outlines programs for Italian Air Force: 5/411
How will Europe produce its 1990s helicopters? *Mark Lambert*: 5/439
Ship defences respond to new missile threats: *Brian Wanstall*: 5/445
Radar trends to the year 2000: *Eli Brookner*: 5/481
Gripen emerges: 6/538
US Navy next-generation air-to-air missile: 6/541
LHX doubts continue: 6/541
The new Soviet fighters – how good are they? *Bill Sweetman*: 6/577
STOVL at sea – mixing helicopters and Harriers on carriers: *Brian Wanstall*: 6/585
Flying the CF-18 Hornet: *Mark Lambert*: 6/595

USN airship program: 7/698
Military airlifters – more than just camouflaged commuters: *Brian Wanstall and Mark Lambert*: 7/731
Two nav/attack systems for Chinese A-5s: 8/784
Penetrate for covert low-level interdiction: 8/784
T-CSF flight-testing new Mirage 2000 radar: 8/785
The new Panther shows its claws: *Mark Lambert*: 8/823
Helmet displays for the combat-proven air force: *Charles Gilson*: 8/828
Military pilot training – options proliferate: *Brian Wanstall*: 8/831
Canadair's CL-227 Sentinel gains credibility: *Mark Lambert*: 8/839
RAM production go-ahead: 9/884
UK report on Falklands lessons: 9/886
GD offers Agile Falcon: 9/886
After the zero-zero option, what is left? *John Tillman*: 9/913
Anti-tank helicopters for the rich and not so rich: *Mark Lambert*: 9/921
Arms to stop SAMs – anti-radar missiles reduce the odds: *Brian Wanstall*: 9/929
Aermacchi 339C system nears IOC: 10/1008
What follows Israel's Lavi? 10/1008
Full simulators for RAF Tucano basic trainers: 10/1009
USA to join French fighter program? 10/1009
The START talks could help in reaching a strategic nuclear balance: *John Tillman*: 10/1019
Navy leads US unmanned aircraft advance: *Bill Sweetman*: 10/1025
Jumping jet power for the next century: *Charles Gilson*: 10/1033
ASTOVL in the USA – fighting for attention: *Bill Sweetman*: 10/1039
Big rise in Japanese defence funding bid for 1988: 11/1134
Japan to develop US aircraft as FS-X: 11/1135
Australian defence budget misses White Paper target: 11/1135
Second-echelon surveillance – stand-off radars to even battlefield odds: *Brian Wanstall and Ramon Lopez*: 11/1151
Armscor – sustaining South Africa's sanctioned air force: *Charles Gilson*: 11/1157
Falcon Eye, Hypersonic Glide Vehicle and other innovations: *Bill Sweetman*: 11/1165
339C avionics give performance at an affordable price: *Mark Lambert*: 11/1171
HAL Advanced Light Helicopter design work complete: 12/1240
Points on Polish helicopters: 12/1242
Upgrading sub hunters to match underwater advances: *Brian Wanstall*: 12/1275
Egrett — West Germany's unsecret spy plane: *Peter Pletschacher*: 12/1283

GENERAL AVIATION

Light aircraft engines picking up? 1/15
Amphibians – toe in the water again, or big new splash? *Marc Grangier and Greg Waskul*: 1/61
The year of the Starship: *Marc Grangier*: 1/65
Very small business jets – supply is increasing but will demand follow suit? *Marc Grangier*: 2/157
Pilot training – Alitalia has its own answer: *Marc Grangier*: 2/161
SCOMA Energie proposes light aviation diesel engine: 3/202
Partenavia Mosquito marks time: 3/202
GAMA – 1986 results and prospects for 1987: *Marc Grangier*: 3/265
WENI light helicopter: *Pierre Condom*: 3/269
P-180 Avanti flight test update: 4/306
Voyager: Cessna recalls old record: 4/306
Gulfstream IV gets vortilons: 4/306
Australia's improved Nomad II re-enters the US market: 4/309
Are tandem, diamond, joined and Warren wings related? *Darrol Stinton*: 4/349
Aérospatiale plans for helicopter sales recovery: *Marc Grangier*: 4/354
Good prospects for Porsche despite the recession: 5/414
Preproduction Seastar about to fly: 5/414
Gulfstream IV world record plan: 6/544
Seastar first flight: 6/545
Proving that Avanti stands for progress: *Marc Grangier*: 6/645
Rejuvenated Falcon 20: 7/692
Gulfstream Aerospace GIV – the maximum business jet: *Mark Lambert*: 7/737
Slow progress towards all-weather helicopters: *Mark Lambert*: 7/742
In the wake of Starship: 8/789
Helicopter insurance: 8/789
Re-engining business aircraft – a mixed blessing for the salesmen? *Mark Grangier*: 8/841
Futura program now operational: 9/888
Piper engines? 9/890
GAMA still in decline: 9/890
Aiming for a piston speed record: 9/890
New Schweizer: 9/891
Emergency medical service helicopters: *Douglas W. Nelms*: 9/969
Cross-fertilisation at Oshkosh: 10/1006
Lear 31 starts flight testing: 10/1007
Express parcels services boom in Europe: *Bertrand Bonneau*: 10/1097
Business aircraft broking: 10/1117
Bristow details rescue offer: 11/1139
Towards a new Challenger: 12/1245
Mooney launches Porsche power: 12/1245
Turbine-powered Malibu: 12/1245
The European helicopter scene: *Mark Lambert*: 12/1285
Swearingen plans a modern business jet: *Bill Sweetman*: 12/1289
How to fly without elevator trim: *Bertrand Bonneau*: 12/1292

SPACE

Ariane recovery delayed: 1/20
Hermes on the launch pad: 1/20
From Salyut to Mir – the evolution of Soviet space stations: *Bob Jaques*: 1/69
DoD threat to international Space Station: 2/104
Satellite links branch out – diversifying space communications: *Chris Bulloch*: 2/167
Germany gets its act together: national space agency and Hermes company discussed: 3/200
Ariane still stalled: 3/200
MDAC wins MLV contest: now for HLV? 3/201
NASA budget request: modest increase sought: 3/201
Search and rescue by satellite – slow steps towards an operational system: *Chris Bulloch*: 3/275
Space Station anxieties: 4/305
Titan defies Ariane 4: 4/305
Launches succeed: 4/305
Where (and what) is the UK Space Plan? 4/305
Argos – satellite links for data platforms: *Chris Bulloch*: 4/356
General Dynamics joins the launcher contest: 5/412
Hermes slimming cure: 5/413
Space Station scale-down: 5/413
Atlas failure probe: 5/413
Europe's planetary programs: *Andrew Wilson*: 5/491
Space Station bids requested: 6/546
Advanced Launch System looks like Shuttle II: 6/546
Soviets launch big booster, step up space services export drive: 7/694
AUSSAT shares the risks for its second generation: 7/745
New US launcher proposals emerge: 8/786
Locstar gets on the road: 8/786
Hermes weight grows, payload shrinks: *Bob Jaques*: 8/845
British DBS plans take shape: 9/882
Columbus takes shape – Europe's space station approaches decision time: *Chris Bulloch*: 9/975
Ariane back in service: 10/1010
H-I success in Japan: 10/1010
Space launchers – where the West stands: *Bob Jaques*: 10/1103
Soviet Union celebrates Sputnik 1: 11/1140
IAF conference: money matters: 11/1140
ESA comes of age: 12/1244
Soviet plans for Mars: *Andrew Wilson*: 12/1295

INDUSTRY

Airbus Industrie redefines the A330/340 program: 1/14
Airline pilot supply – can the demand be met? *Bron Rek*: 1/71
Simulator makers face new market conditions: *Mark Lambert*: 1/75
Airliner maintenance market expands: *Bron Rek*: 2/164
SuperFan sparks new engine war: 3/194
Canadair launches CL-215T: 3/196
More details of EMB-123/IA-70: 3/196
Dornier 328 progress: 3/196
Airbus A340 improves competitiveness: 4/302
Interavia ground radar catalogue: 4/366
Vapour-cycle air conditioning – ABG-SEMCA consolidates its position: *Marc Grangier*: 4/389
UDF flight testing: 5/408
GE takes on P&W/R-R/Turboméca in US military helicopter engine sweepstakes: *Ramon Lopez*: 5/497
Heat exchangers for turboshaft engines: *Peter Pletschacher*: 5/507
Holographic head-up displays: *Pierre Condom*: 5/516
New BAe 100-seater flies: 6/542
Australia's aerospace industry looks for export growth: *Charles Gilson*: 6/613
Canada's aerospace industry flourishes with new owners: *Mark Lambert and Chris Bulloch*: 6/631
Lufthansa worries about V2500 problems: 7/689
Boeing refines 7J7 definition: 7/690
American imports up: 7/690
Derivatives in, propellers out at Airbus: 7/691
International Aero Engines fixes the V2500: 8/782

Commercial JVX proposed: 9/883
EH 101 looks assured in Canada: 9/883
Boeing postpones 7J7 by a year: 10/1005
Slump forces changes at Dassault-Breguet: 11/1138
Fokker finances stretched: 11/1138
Where are simulators going? *Mark Lambert*: 11/1201
Scramjet – the NASP propulsion goal: *Bill Sweetman*: 11/1207
A technology nursery for Rolls-Royce military engines: 11/1213
Commercial aircraft: the US/European controversy: 12/1238
Singapore aims for increased aerospace activity: *Bron Rek*: 12/1269
TCAS on trial – alerting pilots and avoiding collisions: *Bill Sweetman and Charles Gilson*: 12/1302
APU competition heats up: *Bill Sweetman*: 12/1305
Thomson-CSF wins overseas helicopter display orders: *Mark Lambert*: 12/1308
Piper calls a new time: 12/1315

TECHNOLOGY

Boeing's Model 360 ready for flight: *Bill Sweetman*: 6/605
For or against the tilt-rotor? – two views of the Eurofar project: *Marc Grangier*: 6/649
DVI in the military cockpit – a third hand for the combat pilot: *Brian Wanstall*: 6/655
The 'super cockpit' and beyond: *Claude Maureau*: 6/671
Airborne navigation plots its future: *Pierre Condom*: 8/851
West Germany ensures its future helicopter technology: *Peter Pletschacher*: 8/857

SUPPLEMENT

Business aviation special, 1987: 9/935

ENGINEERING

Designing interiors for real people: *Paul Sillers*: 7/751
New propellers for light aircraft: *Peter Pletschacher*: 7/754
Progress made in FAR 145 dispute: *Bron Rek*: 9/983
Advanced simulation for Advanced STOVL: *Brian Wanstall*: 10/1107

HELICOPTER SUPPLEMENT

World civil helicopter census: *Marc Grangier*: 2/145
Making simulators fly like helicopters – on the very edge of fidelity: *Mark Lambert*: 2/151
Can a new small helicopter succeed? *Mark Lambert*: 2/154

SPECIAL REPORTS

In Shanghai: China Aviation 86: *Pierre Condom*: 2/109
Israel's aircraft industry – tied to a lion's tail? *Brian Wanstall*: 3/205
Civil helicopter market in suspense: *Greg Waskul*: 4/315
French aerospace industry faces up to hard times: *Germain Chambost, Pierre Condom and Marc Grangier*: 5/453
Salon du Bourget 87: 8/795
The world's major airlines: *Bron Rek and Ingrid Oulevay*: 10/1041
Airliner acquisitions, 1986-87: *Bron Rek*: 10/1075
NBAA 87 – signs of recovery? *Bertrand Bonneau and Bill Sweetman*: 11/1146
China in pursuit of partners: *Pierre Condom*: 12/1249
Shanghai projects a new airliner: *Zhang Jiashun*: 12/1256
Is the MPC-75 the start of a German-Chinese alliance? *Peter Pletschacher*: 12/1257

ASIAN AEROSPACE 88

Shop window for Asia-Pacific market: *Bron Rek*: 11/1181

AVIONICS

Harrier GR.5 becomes an area of interest in simulators: *Mark Lambert*: 7/755
Lasers against microbursts: *Pierre Condom*: 7/758

OPERATIONS

Do we really need air traffic control? *Frank W. Fischer*: 4/359

REGULAR FEATURES

Editorials:
Euro-deregulation – ideals and reality: *Bron Rek*: 1/7
Europe in disarray: *Pierre Condom*: 2/93
Time for a turboshaft: *Charles Gilson*: 3/189
Glamour attracts money: *Bron Rek*: 4/297
What a way to run an engine program! *Bron Rek*: 5/403
Looking beyond the short term: *Pierre Condom*: 6/531
Where next for Airbus? *Bron Rek*: 7/685
And after collaboration? *Pierre Condom*: 8/777
A boost for the EH 101: *Mark Lambert*: 9/877
Towards autonomy in space: *Chris Bulloch*: 10/1001
If you can't join them, beat them: *Charles Gilson*: 11/1131
Lunch with the dinosaur: *Bill Sweetman*: 12/1233
Our correspondents report: 1/11, 2/95, 3/191, 4/299, 5/405, 6/535, 7/687, 8/779, 9/879, 10/1003, 11/1133, 12/1235
World of aerospace: 1/11, 2/95, 3/191, 4/299, 5/405, 6/535, 7/687, 8/779, 9/879, 10/1003, 11/1133, 12/1235
Airliner acquisitions: 1/13, 2/97, 3/193, 4/301, 5/407, 6/537, 7/689, 8/781, 9/881, 10/1004, 11/1136, 12/1237
People & Calendar: 1/18, 3/203, 4/310, 5/416, 6/549, 7/699, 8/790, 9/892, 10/1014, 11/1142, 12/1246
Technology, products, markets: 1/78, 2/173, 3/279, 4/383, 5/509, 6/663, 7/761, 8/861, 9/985, 10/1113, 11/1215, 12/1310
Books: 1/83, 2/177

AUTHORS

Bonneau, Bertrand
BR-2000 – a bold workhorse? 9/903
Express parcels services boom in Europe: 10/1097
NBAA 87 – signs of recovery? 11/1146
How to fly without elevator trim: 12/1292

Brookner, Eli
Radar trends to the year 2000: 5/481

Bulloch, Chris
Satellite links branch out – diversifying space communications: 2/167
Search and rescue by satellite – slow steps towards an operational system: 3/275
Argos – satellite links for data platforms: 4/356
Canada's aerospace industry flourishes with new owners: 6/631
Columbus takes shape – Europe's space station approaches decision time: 9/975
Editorial: Towards autonomy in space: 10/1001

Chambost, Germain
French aerospace industry faces up to hard times: 5/453

Clostermann, Jacques
CASA CN-235 – last but not least: 7/719

Condom, Pierre
Boeing 7J7 design to be frozen in July: 1/23
Editorial: Europe in disarray: 2/93
In Shanghai: China Aviation 86: 2/109
WENI light helicopter: 3/269
French aerospace industry faces up to hard times: 5/453
